MODEL:MFP-5398 & MV-5198 (WIRING DIAGRAM)

## WARNING:

Before servicing this chassis, read the X-RAY RADIATION PRECAUTION & PRODUCTS SAFETY NOTICE of this manual.

## CAUTION:

The shaded areas in the schematic diagram and the parts list designate components which have special characteristics important for safety and should be replaced only with types identical to those in the original circuit or specified in the parts list. Before replacing any of these components, read carefully the PRODUCT SAFETY NOTICE of the manual. Do not degrade the safety of the receiver through improper servicing.

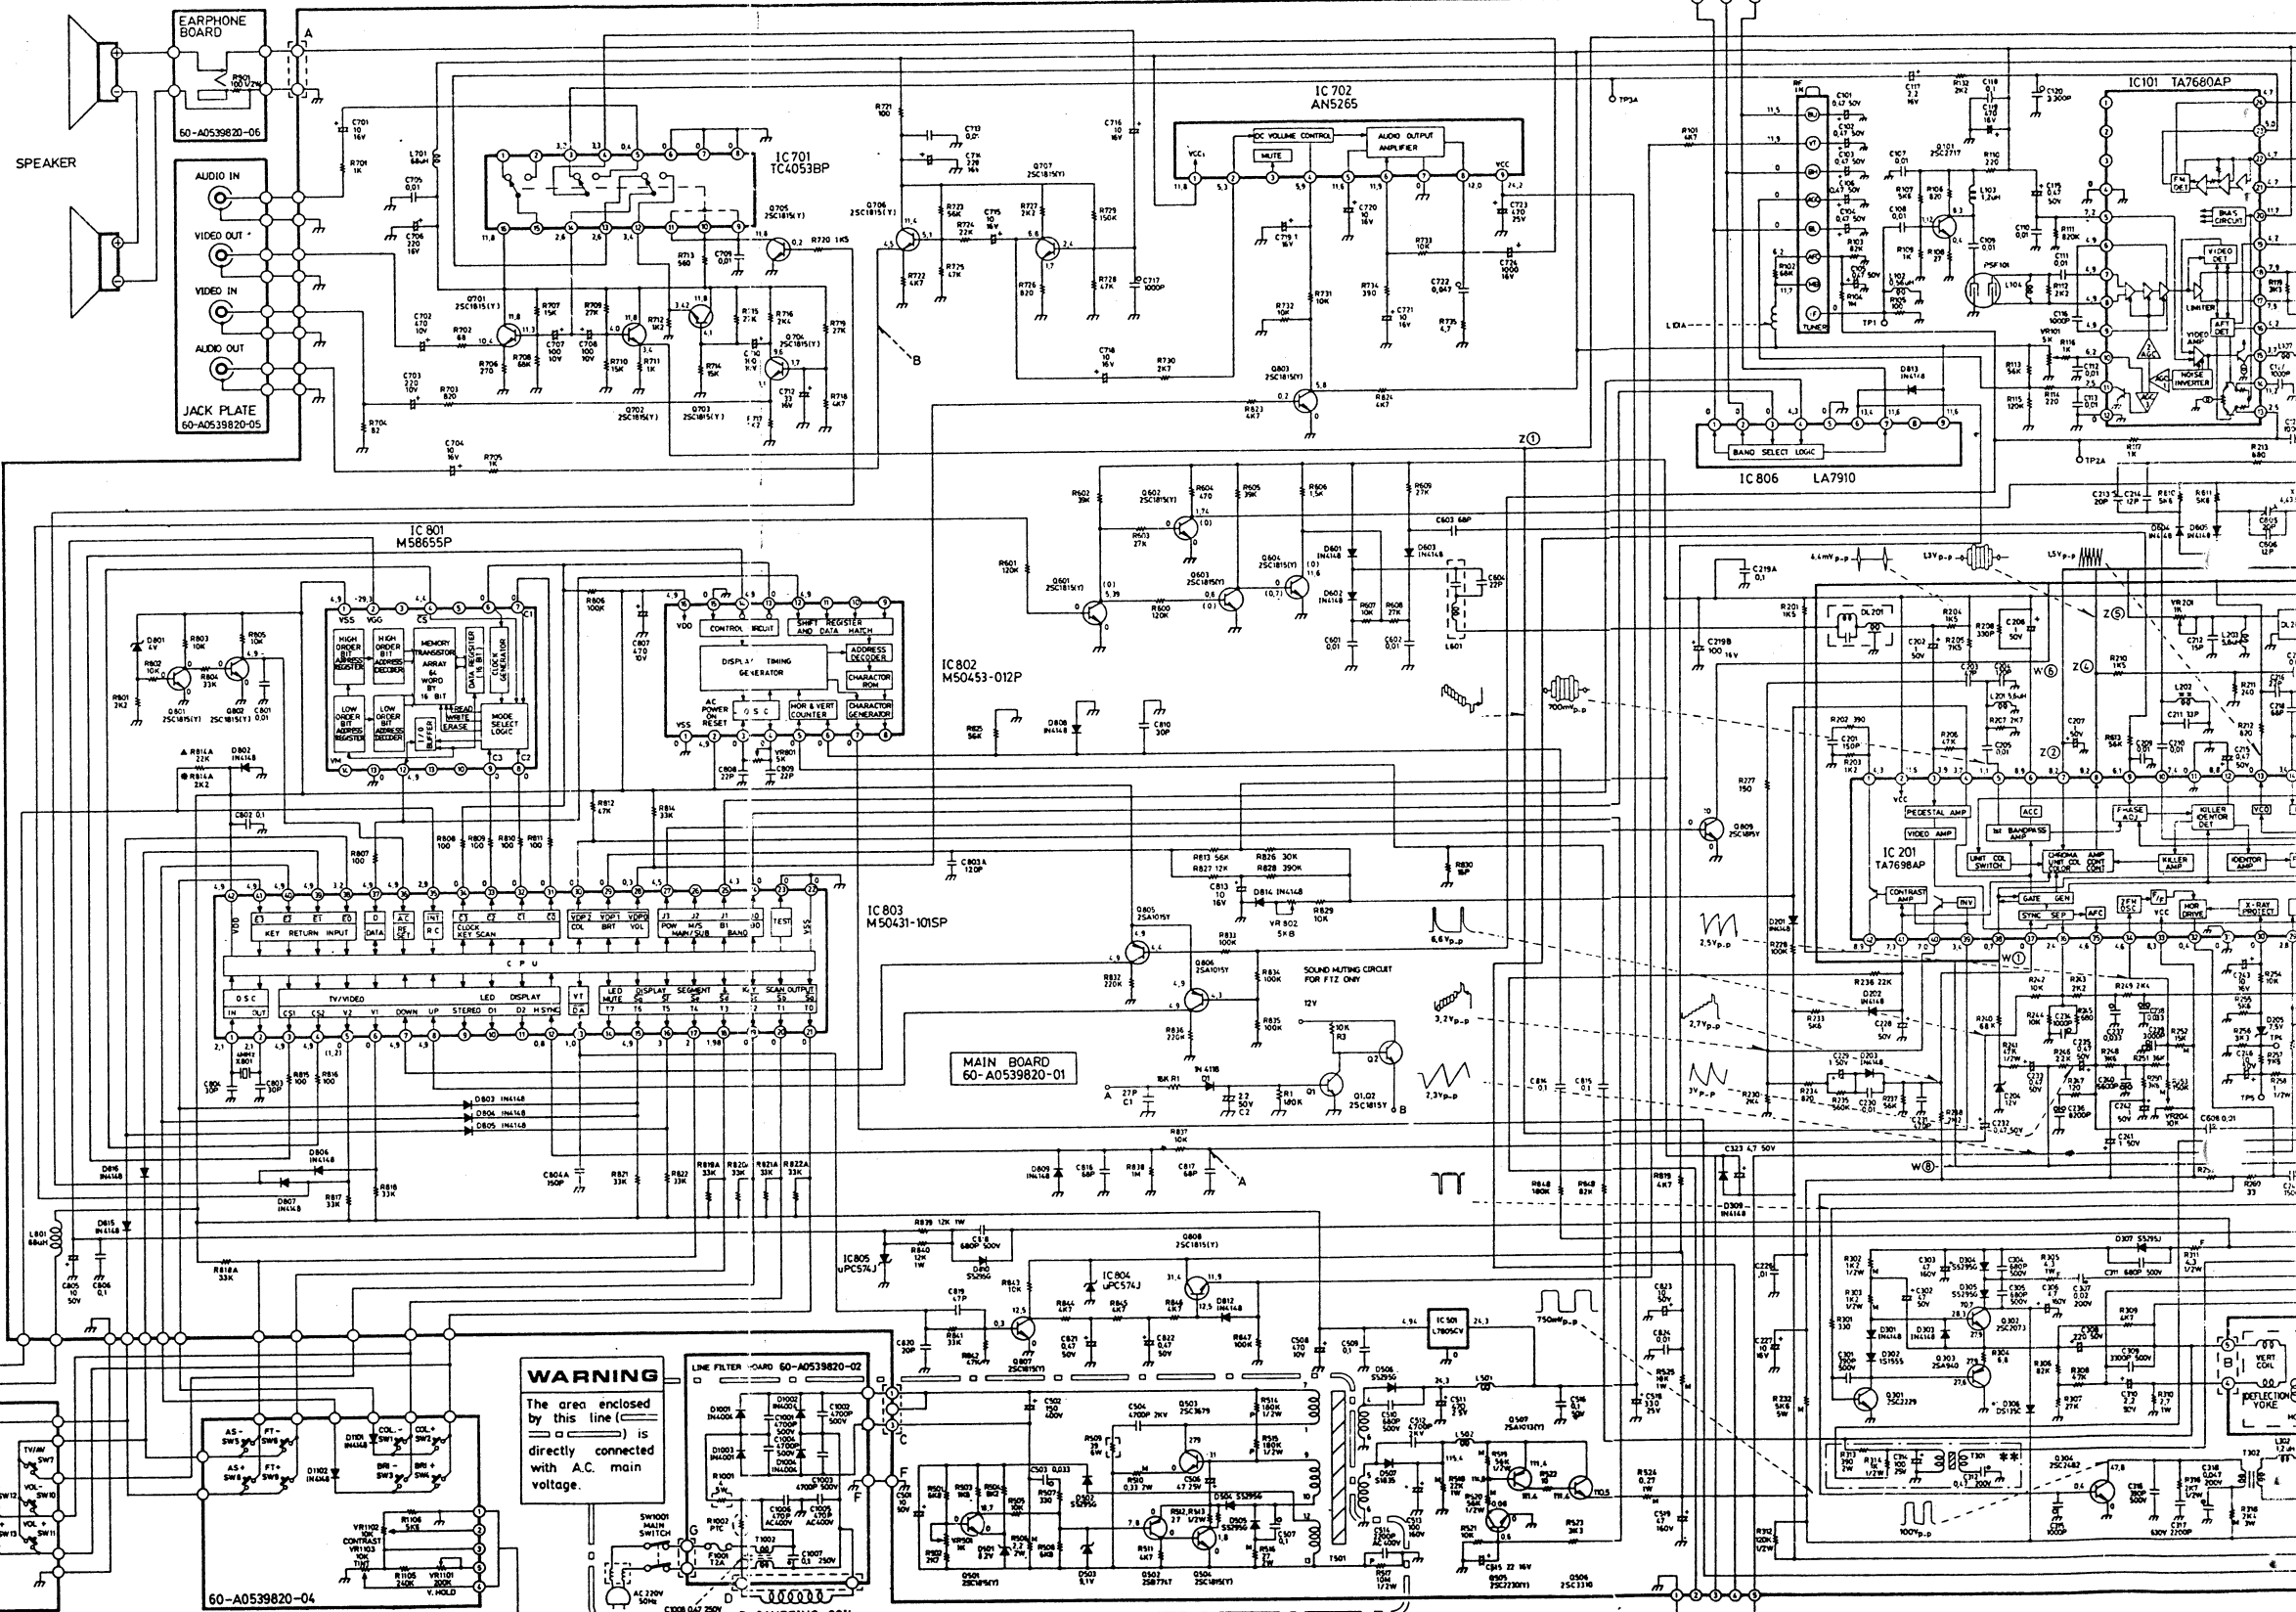

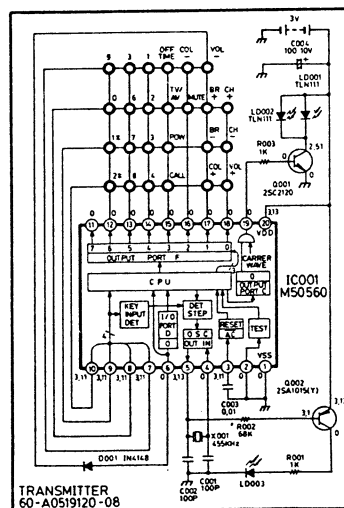

## NOTE:

1. Voltages are measured with DVM from point indicated to chassis ground, using color bar signal with all controls at normal position.
2. Waveforms are measured with synchroscope from point indicated to chassis ground, using color bar signal with all controls at normal position.
3. All resistors are 1/4w ±5% carbon film resistor unless otherwise listed. Resistance unit is in ohm, M=1,000,000, K=1,000.
